

The program is designed as a Higher or Lower Game, as it was the first thing to come to mind when I looked at the rubric for this project. The numbers go up to 100, and you keep guessing a number, an output appears, either Lower, Higher, or Correct. There is also a button for creating a new game.

I used ChatGPT as an aid for this code under the prompt "Using this rubric, help me with my current code for the Higher or Lower Game".

Higher or Lower

Start New Game

Game ID: 2

49

Guess

lower

Higher or Lower

Start New Game

Game ID: 3

32

Guess

Correct!
